U.S. Army Corps of Engineers to conduct Restoration Advisory Board meeting for former Nebraska Ordnance plant Thursday

MEAD, Neb. -- The U.S. Army Corps of Engineers, Kansas City District, will host a restoration advisory board meeting regarding the former Nebraska Ordnance Plant at 7 p.m. Thursday, July 13, in the Mead Community Center in Mead, Neb.

There will also be an open house from 4 p.m. to 7 p.m. for those who wish to speak with Corps officials individually.

In addition to reporting about ongoing cleanup activities at the site, Kansas City District officials plan to discuss the results of groundwater sampling done in March 2006 as well as outline the Site Management Plan.

Last month, the project team led members of the RAB and the public on a tour which included the main treatment plant on County Road 6 and the new groundwater treatment plant on the west side of the project site.

The RAB is part of the ongoing community involvement efforts by the Corps in conjunction with the remediation of the former defense site.

For further information on the Mead project, please visit the project web site at <http://www.nwk.usace.army.mil/projects/mead/projectindex.html>.
